GREYSTONE MINE TO BE REOPENED

A company composed of San Francisco and Alaska business men have secured an option and bond on the Greystone property seven miles above Washington from the Hegarty interests and are proceeding to open it at once.

The property consists of eleven claims, covering two distinct lodes for more than 6000 feet along their strike.

The main vein, which has a width of from two to six feet, is in the diabase-slate area adjoining the serpentine on the east. Its course is a little east of north, being with the formation, and its dip is about 60 degrees west.

The Greystone gets its name from an intrusive quartz-porphyry dike some 600 feet in length and about 150 feet in width, from which has been mined and sluiced by hydraulicking it is said, about $100,000 in gold. A two-stamp mill was erected in 1890 and yielded about $34,000 from iron seams within the dike material.

The McKaig shaft was sunk on the vein to a depth of 150 feet, but no drifting was done. Ore from this shaft is said to have plated $10 per ton in free gold.

A tunnel 900 feet in length tapping the vein about 340 feet vertically below the McKaig shaft was run by George W. Hegarty in 1910-11. It is through this tunnel that it is now proposed to develop the vein laterally by drifting under the McKaig shoot and also toward the dike enriched erea to the north.

The property immediately adjoins the Spanish Mine, now being extensively operated by Fred W. Bradley, on the west and is in a very promising area along the belt extending through the Twin Sisters, northerly toward the Plumbago and the Alleghany District.

Charles A. Hegarty is to have charge of operations at the mine and will leave the latter part of this week to get things in readiness for active development.

ASSEMBLY THANKS MINING ASSOCIATION

The following resolution was presented to the Nevada Chapter of the California Mining Association by the California Legislature:

CALIFORNIA LEGISLATURE-
ASSEMBLY CHAMBER
FORTY-NINTH SESSION
Sacramento, Cal.
RESOLUTION
By
HONORABLE BERT B. SNYDER
Representing the Forty-Second Assembly District

WHEREAS, The Nevada, Placer, Sierra and Yuba chapter of the California Mining Association presented to the members of this Assembly an invitation to attend the meeting of said chapter held at Nevada City on the afternoon of March 7th, 1931, which invitation extended to include dinner, entertainment and hotel accomodations on the evening of March 7th and a visit to certain operating gold mines on March 8th; and

WHEREAS, A goodly representation of this Assembly accepted such invitation and participated of the hospitality of said chapter; and

WHEREAS, The gold mining industry long has been and still is one of the leading industries of this State and its problems are deserving of continued study and assistance; now, therefore, be it

RESOLVED, That the thanks of this Assembly be extended to said chapter through James D. Stewart, Esquire, its president, and Mrs. Elsie Willoughby, its secretary, for said invitation, and to the Honorable Jerrold L. Seawell, a member of this Assembly, through whose cooperation the success of the said meeting and entertainment was assured; and be it further

RESOLVED, That this resolution be printed in the Journal of this Assembly, and a copy thereof sent to the said James D. Stewart, the said Elsie Willougby, and said Jerrold L. Seawell.

Resolutioo sead, and on motion, unanimously adopted.

EDGAR C. LEVEY.
Speaker.

SKI CLUB TO HOLD PICNIC JUNE 21 ST

A meeting was held on Wednesday evening by Ski Association Benefit Committee. Richard Goyne presided. Wm. Griffith was appointed secretary. A benefit picnic will be held Sunday, June 21ts at Sport Field of the Ski course.

H. W. Robinson was appointed chairman of the day. The following committees were appointed:

Music—H. Hartung, Meyers Mobley.

Concessions—Eben Smart, W. M. Sampson, Grass Valley, J. J. Fortier, Nevada City.

Refreshments—E. W. Schrieber.

Advertising—E. C. Uren, Robt. Ingram, J. W. O'Neil, O. D. Woodman.

Invitation—R. J. Bennetts, Vernon Stoll, H. W. Robinson, W. E. Wright.

Sports—Chas. Leiter, Dan Stewart Francis Hogan, Ed Baker.

Transportation — James Dolan, Joseph Knebone.

Finance — Fred Cassidy, J. E. Gooding, Horace Curnow, Rollo Wright.

Next Sunday morning at 10 o'clock the committee will meet at the Chamber of Commerce to go to sports field to decide what is necessary to put it in 1st class condition.

Tentative plans call for a program to include foot races, horse racing and other events. There will be a base ball game.

It is hoped by the committee to raise enough money to pay off the indebtedness.

SEAWELL EXPLAINS ASSEMBLY BILLS

This is the first of a series of articles of explanation of Bills introduced by Assemblyman Seawell that passed both Houses of the Legislature.

The purpose of this is to allow the people of his district to know what their representative has been doing in Sacramento, and the type of legislation that he has introduced believing the same to be of benefit to the District.

Jerrold L. Seawell

* * *

Assembly Bill No. 412
The State Judges Salary Bill

Asembly Mill no. 412 by Assemblyman Jerry Seawell has been recognized by the metropolitan Press as one of the outstanding bills to pass the last Session of the Legislature.

This bill provides that the State shall pay $4000.00 toward the salaries of all the superior Judges in the State of California. In the past paid $4000.00 toward the salary of the Judges in Los Angles and San Francisco Counties with a sliding scale for the other metropolitan counties.

It was the usual practice of the State in the rural Counties to pay one-half of the salary to the Judges and the County pay the balance. Under the provisions of this bill the State pays $4000.00 toward the salaries of all Superior Judges and the differences between what the State will pay under this bill and what it now pays is returned to the General Fund of the several Counties.

Providing the Judges salaries are not raised by the counties themselves the rural sections of California will save approximately $67,500.00 annually. In his particular district with the raises granted there will be a savings of $5,000.00 during the term of office to which the judges are elected.

He believes this bill is an exceptionally fair one, due to the fact, that the Judicial Council of California takes the Judges from the rural counties and uses them in the large centers of population, that it is only fair that the State should pay the larger portion of the salaries, as they are no longer County Judges but are reality in the employ of the State.

EAGLE BIRD MINE EMPLOYEE SUFFERS INFECTED LEG INJURY

Ivan Kendall, employee of the Eagle Bird mine, above Washington is suffering from an infected leg injury. Dr. R. F. Werner is attending him at the Nevada City Sanitarium.

G. V.-N. C. MINES HAVE GOOD PRODUCTION RECORD IN PAST

In 1896, at the time of the Irish American— North Star litigation, the North Star Mine was considered bottomed at the 2400 level; in fact no drifting had been done below the 2300 level for more than two years and attention had been turned to whatever ore remained in the upper levels of the mine. The total production up to that time had been, according to Lindgren, about $5,000,000.

Manager A. D. Foote had faith that a new ore field could be opened up in depth and after much difficulty the Central Shaft was sunk vertically to a depth of 1600 feet tapping an excellent body of ore where it encountered the vein at the 4000 level, or 1600 feet on the vein below the 2400 level.

The mine is now at the 9000 level and still producing, 80 years after its discovery. The total production is setimated at $32,000,000, more than 80 per cent of which has come from ore below the 2000 level.

The Empire mine, discovered in 1850, and working continuously ever since, has produced nearly $50,000,000. It has reached a depth of 7600 feet on the vein and has a total of more than 60 miles of drifts. Last year the gross production of the combined properties, which are now operated by the Newmont Mining Company of New York, was better than $1,600,000 and in neither property has the vein been bottomed.

While the Kennedy Mine at Jackson is said to be the deepest gold mine in the world at 4760 feet vertically, it does not reach the total depth along the vein of the Empire by 2800 feet, nosth of the North Star's two vein systems by more than 4000 feet.

The Champion-Providence group at Nevada City had reached a depth of 3000 feet on the vein at its lowest point at the time of its closing in 1921. It was not the failure in the value of the ore which led to its closing but post war conditions which made it impossible to finance further development.

The ore bodies close to the shaft were somewhat too narrow for sinking on at the time and a lateral development was planned which would have tapped ore shoots which were known to exist further north on the 2400 level.

Assays from samples taken from the 2700 and 3000 stopes of the Providence ran as high as $86 per ton and showed a general average of value much higher than on any of the upper levels of the mine. The 2700 stopes were carried as wide as 13 feet between the walls and the vein was still continuing at the bottom of the lowest workings with as great strength as at any point above.

The history, past and present, of the mines of both Grass Valley and Nevada City Districts are therefore of great vital interest in respect to the fact that it has been demonstrated by actual workings that depth has had no appreciable effect on the strength of the vein systems even at what may be considered an extreme limit, nor has it as yet been demonstrated that depth has resulted in producing an ore of lower value. In fact, in most instances, the contrary has been true.

We therefore believe, on account of these outstanding examples of deep mining, that we have in these districts the best known field for gold mining there is in existence.

There is still a great potential field here for the development of large productive properties. All that is needed are capital and development along the lines of good judgement.

"FINIS".

G. V. TO CELEBRATE NATIONS BIRTHDAY

To Grass Valley this year falls the lot of celebrating the nations birthday and they have chosen to take advantage of the week-end holiday by combining the celebration of the 4th with a big home coming. Bert Chegwidden is ch irman and is selecting committies to assist him.

The celebration will begin on the evening of the 3rd when the American Legion Drum Corps will compete for a trophy. There will be at least six corps in the contest.

The big parade on the morning of the 4th will be in the form of a pagent depicting the history of our Nation from the Indians down to the present day.

The rest of the day will be given over to contests of various kinds including all kinds of sports an rock drilling and shoveling contests. There will be races for all ages and both sex.

In the evening there will be a display of fire-works.

For Sunday July 5th a baseball game and golf tournament is being planned.

In all Grass Velley plans to make it, the biggest and best celebration in years.

MINING ASSOCIATION TO MEET ON JUNE 2.

Nevada County Chapter Mining Asociation of California will hold a busness meeting Tuesday evening June 2 at the Chamber of Commerce in Nevada City. Arthur Foote of Grass Valley, the new president of the chapter, will preside.

BUCKLEY WELLS SHOOTS SELF WITH PISTOL

Buckley Wells formerly associated with Harry Pane Whitney in reopening the Idaho Maryland Mine shot and killed himself Tuesday.

Mr. Wells, a prominent mining man once reputed to be very wealthy, was despondent over the loss of his wealth. He shared an office in the Hobart Building with Joseph O'Brien who had gone to the bank to draw $20 to loan his friend when the shooting occurred.

Fate which first smiled upon him turned to frown. Missing the rich vein of the Idaho Maryland by inches the mine was abandoned. When the new owners reopened the mine they found where a drill had been broken off. The first blast loo ened the rock where the drill had struck. There on the other side within a few inches of the drill hole was free gold in quantity.

His power project on the Yuba River failed and the stock market crash of 1929 completed his financial failure.

RESPOND TO EMERGENCY CALL

About 30 answered test.

The emergency call of the fire alarm and signid up.

Two bells rung three thimes in the call given out in times of emergency to which Legionaires are expected to respond.

ATTENDS CONCERT

A large crowd attended the concert at the theatre given by the Music department of the high school and grammar school under the directions of Harold George, Miss Gray and Miss Nightingale.

SWIMMING POOL OR STREETS AND SEWERS

Today the people of Nevada City will go to the poles to decide whether or not the $10,000 which was voted five years ago to build a swimming pool will be converted to use for the purpose of improving streets and sewers or not.

However the general opinion seems to be that since the people voted 5 to 1 in favor of the swimming pool five years ago they will not vote to have the money diverted for other purposes.

PIONEER MOTHER PASSES IN PLEASANT VALLEY

Mrs. Sophie Schwartz, mother of a large and prominent Nevada County family, passed away at her family hame in Pleasant Valley Monday afternoon after having reached the ripe old age of 83.

Four months ago Mrs. Schwartz was stricken with paralysis which she endured with uncomplaining fortitude until death came as a release to her suffering. She was constantly attended during her last illness by her loving and devoted daughters.

She was born in Quincy, Illinois, May 25, 1848, the first born child of Sophie and Adolph Hartung. In 1853 Mr. and Mrs. Hartung crossed the plains to California.

Being reluctant to subject a child of the tender age o f three to the hardships of the covered wagon trail, Sophie was left in Illinois with an aunt, Mrs. J. C. Saybold, the wife of a Lutheran minister.

Here amid the Christian atmosphere she grew to young womanhood. In 1871 she came to California to join her parents and younger brothers and sisters whom she had never seen.

Two years later she was married to Theodore Schwartz and to this union ten children were born, eight of whom survive their mother.

Mr. Schwartz passed away in 1910 but Mrs. Schwartz continued to live in her Pleasant Valley home until the time of her death, in her quiet way.

Funeral services were held at Pleasant Valley Wednesday afternoon with interment in Pine Grove cemetery in Nevada City. Reverend Buckner conducted the services and Mrs. Lydia Talbot sang. The family lot was completely covered with beautiful floral offerings, a mute attest to the esteem in which the venerable woman was held.

Surviving sons and daughters of Mes. Schwartz are; Ferdinand, Theodore, Alphonso, Otto F. and Ernest Sihwartz; Mrs. H. O. Kohler, Mrs. Rose Grissel and Fannie Schwartz. Step children are Mrs. Emma Hartung, Mrs. Mary Fitzgerald and William Schwartz. Brothers and sisters are A. Hartung, Nevada City; H. W Hartung, Grass Valley, and Mrs. Amelia McCoy, Cold Water Ohio.

Grandchildren are, Teddy Schwartz George Kohler, Berkley Schwartz, Milton Schwartz.

KJORLIE IS ELECTED PRINCIPAL HIGH SCHOOL

H. Kjorlie who has beein acting as vice principal was elected principal of the High School by action of the city board last night.

Mr. Kjorlie has eight years of teaching experience to his credit.

During his three years work in the Nevada City High School Mr. Kjorlie has been a favorite of the pupils who are dilighted to have him promoted to principal.

Mr. and Mrs. Kjorlie have both been identified with civic affairs and the people of the community are rejoicing that they find it unnecessary to change their residence.

The Nugget joins the many friends in congragulating Mr. Kjorlie.

QUILL OFF PRESS

The 1931 Quill, the annual production of the Nevada City High School is off the press and is a credit to the school and staff of officers.

CHICKEN STEW AT UNCLE TOMS

Uncle Tom will hold a special Memorial Day Dance Saturday night at his hall on the Downieville Road

Special chicken stew will be served at midnight for which the small sum of 25 cents will be charged.

With the coming of the warm summer Uncle Tom's Cabin is a delightful place to spend a pleasant evening dancing to the strains of the beautiful music which the host always provides for his guests.

A large number of former residents will spend the week end here and many of them remember the happy times they used to have at Uncle Tom's Cabin and will no doubt again find their way there.

HOFF REOPENS GROUP OF MINES

The Federal Loan Consolidated Mines, J. M. Hoff, manager, have taken over a griup of mines on Deer Creek above the Murchie mine and are reopening old shafts and planning to do a great deal of development work.

The group includes Federal Loan which has a good record; Le Compton of E. J. N. Ott, which was a big producer in the past; La Belle group owned by Mebius interests; Cyane & Constitution, Peter Taulpuas heirs; The Never Sweat, St. Louis, Jackson, byCelio and Associated, the ore here aasays $90 per ton.

Work at the present time is being concentrated mainly on the Constitution. The gallows frame has been erected and the work of cleaning the old shaft begun. Inspector Low of the Industrial Accident Commission visited the shaft on Wednesday and complimented the manager on the safety devices used.

An air compressor has been installed and a generator which will furnish lights underground. About twenty men are already at work doing two shifts. The work is all being pushed as rapidly as possible and a remarkable showing has been made in the six weeks work.

The problem of unwatering the shaft was quickly and easily handled by running a drift tunnel from the shaft to Deer creek.

The St. Louis mill is being put into shape to handle the ore from all the properties. It contains ten stamph. A ball mill will also be installed to crush the ore fine enough so that it can be handled by the flotation plant which is being installed by the Industrial Mines Company. The flotation machinery is of the very latest type and several improvements have been made. The inventor claims to save 98% of the gold. Under the old process the sulphides could not be saved and a large percentage of its values found their way to the creek.

The new plant is being installed under the direction of R. N. Diggles.

A pipe line ih being run from the Snow Mountain ditch to the St. Louis mill.

Mr. Hoff plans to lease some of his claims on a royalty basis. He will handle the ore from the leasers at the St. Louis mill. Mr. Hoff is also encouraging prospectors to come into the territory and offers to crush their ore at the St. Louis also.

The first car load of ore will go to Selbys on Saturday.

A number of men are at work opening up different drifts or improving the road to the mines, which is in a very bad condition. In all 40 men are employed.

omce. hasbe enclbh

PENROSE GROCERY MAKES IMPROVEMENTS

The grocery store of James Penrose is undergoing a complete renovation.

The major improvement is the fridigaire window which is being installed. The fridigaire will be 10 by 7 feet in size taking up the entire north window. It will have a triple glass all around. Milk, cream, butter, cheese, yeast, smoked meats and vegetables will be on display. Two service doors and a walkin door will give entrance into the refrigerator. This is the very latest type of fridigaire and the only one of its kind in this section.

Other improvements will include lowering of the shelves. The counters will be moved to the center of the store and the entire interior will be repainted a gloss white with red trimmings.

Howard Penrose is now associated with his father who has been a Nevada City merchant for the past 21 years.

ED WILLIS VICTIM OF CAR ACCIDENT

Word was received in this city by relatives of the death last week of Ed. N. Willis of Berkeley who was victim of a car accident. He was the husband of the former Miss Vera Organ of this city. Besides the widow two children survive.

COZY CORNER

If indications mean anything Nevada City will again be a booming mining town with her laborers burrowing in the bowels of the earth for the yellowing metal.

It is rumored that the Murchie with 135 men employed will within the next two years have nearly 500 men working.

The Hoge Development Company which has been steadily milling rock from $100 to $200 per ton has 15 men employed.

With the opening of the Le Compton Group more men will be employed who will live in Nevada City and trade with our merchants. Mr. Hoff was the first one to reopen the Murchie mine and The Nugget wishes him the same success in his present operation.

But Nevada Citians look longing at the Champion and long for the time when the stamps will be pounding there. Then indeed will the future of Nevada City be assured.

They are painting the town red. Literally, I mean. With Bolton's and the Purity already flaunting vermillion fronts, Jim Penrose comes out this week with a new red coat for the front of his store. Not to be outdone Hitchen Shoe Repair Shop dresses itself in the same brilliant hue. However the gaudy color has not so far found favor in the eyes of the public.

Instead of Nevada City advertising houses for rent they have to advertise, Houses Wanted. W .O. Woodman cannot nearly supply the demand of the people who wish to come here from the Bay Region to spend the summer months.

The National Hotel has many reservations from people who come every year to spend several months enjoying the delightful climate There are many delightful spots in or near Nevada City which would make a delightful place for a camp park for summer tourists. It might be well for the business people of Nevada City to start the movement themselves. It would be necessary to do a little judicial advertising.

The suggestion has been made that a swimming pool and auto camp be combined and the auto camp leased to a responsible party with the understanding that the leasor maintain the swimming pool.

guess the same your case is easily disposed of, but if all guess differently you will be treated for all five ailments.

You may be slated for an operation and when you are rolled into the operating room you are just number 4711 to the surgeon who is just whetting his knife after number 4710 who has rolled out of the other door.

This popular place is said to usually be so crowded that patients are often discharged from the wards before thep are in any condition to leave in order to make room for the waiting lists.

People are already spending billions seeking for health, many of them without much success. The human machine is called upon theses hectic days to stand an awful amount of abuse and it is no wonder that some of the many parts that cause it to function with such nicety are constantly in need of repair. It is remarkable when you think of it that the body stands so much abuse. Good health is best provided for by careful habits but there are very few of us who ever think of it until it is too late.

Minature golf started off with a bang and spread rapidly throughout the country, but it proved to be one of those fads which died out almost asmeteor like as it came in.

Many of those who invested large sums in the building of these picturesque courses now find to their chagrin that the fickle public has practically lost all insterest in the sport. The craze lasted more than a year.

On ninth and Market streets in San Francisco a most elaborate outdoor course was constructed and opened last November on real estate valued at $200,000. The course itself cost $60,000.

Today this course is almost deserted, while the indoor courses along upper Market street have been closed and advertised for rent many weeks ago. It takes a good guesser to foretell the trend of the amusement loving public.

CONCENTRATES

Do not forget that today is election day in Nevada City and everyone should go to the polls and vote —either for or against using the $10,000 now in the city treasury for municipal improvements.

If you think that the money should be spent for the luxury of a swimming pool and that $10,000 will purchase a suitable site and pay for a pool that will be a credit to the community; if you are a taxpayer and are willing to have your taxes increased in order to maintain such a pool—then it is your privilege to vote for it.

But if, on the contrary, you feel at this time it would be better to use the money for necessary street and water improvements; if you consider that yor are already burdened with all the taxes you are able to pay, and that by your vote you will assist in keeping the burden down instead of increasing it —then go and vote the fund for the purpose of water and road improvements.

Above all, if you happen to hear anyone loudly advocating that this money should be spent for a swimming pool and nothing else, just quietly inquire whether this person is a taxpayer or not, also carefully consider whether he or she has some selfish motive in view other than a community interest.

There is much to ponder over at todays election and upon its results will depend either increased taxes, not only for maintaining a pool but also for necessary water and street improvements which need immediate attention, or else much better, a release from any further burdens at least until this financial depression is over—a matter of perhaps three years. Which shall it be?

Dr. William Foster of Washington would have us spend about three billions annually to "buy health", after a committee of fifty experts in medicine had made a study of health economics.

The doctor seems to have a good opinion of himself as well as a great confidence in his brother practitioners.

Unfortunately health is not on the market to be bought either in pills or gills. If it were there would be many purchasers at the counter.

Health is no more easily purchased today than it was a generation ago, with the exception of surgical relief in which admirable progress has been made.

Naturally one would expect that the diagnosis and advice of city doctors, particularly those whose practice brings before them, one might say, an almost continuous stream of human ills, would be infallible.

But many who have gone through the mill will testify that your own family physician, who has the advantage of knowing you and your habits and can and does spend more time and thought with you as an individual, can treat you with a great deal more satisfaction than many of the so-called specialists of city fame.

At Mayo's establishment in Rochester the patient is put through the routine of diagnosis and treatment very much like Henry rolls out his Fords. There you are merely a number and you may stand in line for hours waiting to have your chest thumped, your funny bone hammered, blood sampled, and a dozen other tests made.

With a score card of your imperfections you are ushered into the presence of five doctors who each make a guess as to what's wrong with you. If three out of the five

BACIGALUPI MINE NOW UNWATERED

SONORA, Calif., May 28— The Bacigalupi mine 10 miles northwest of Sonora, being operated, under lease and bond, by Harold Hollamby, former Nevada mining man, in association with Frank Hinckley, of Alhambra, California, has been dewatered, and underground development work is again in progress. The 135-foot incline shaft will immediately be sunk an additional 200feet, according to Mr. Hollamby, who is directing operations. He states that the shaft to its present depth exposes four feet of ore averaging $20 a ton in gold and that in a 15-foot winze below the west drift on the 80-foot level the removal of the water revailed two and a half feet of ore assaying $57 a ton in gold.

In advancing a drift started, from a 200-foot incline shaft on the Saratoga mine, at Shaw's Flat three miles west of Sonora, John W. Lawson, operating under a lease and bond from the owner, Charles Jones, of Sonora, has exposed a four-inch streak of ore assaying $300 a ton in gold. Much of the ore being extracted is liberally impregnated with free gold visible to the naked eye.

Lee R. Cordary of Los Angles and associates have taken over from William Oaks and Jesse A. Sells, of Sonora, a lease and bond on the Dickey Boy mine, two miles southwest of Sonora, which is owned by Charles Segerston, Sonora banker. The banker. The new operators are installing electrical power and mining equipment for extensive development work.

0

SCENIC TIOGA PASS ROAD TO OPEN SOON

Opening of the historic Tioga Pass road a month earlier than usual, probably about June 1, is in prospect unless unexpected snowstorms occur, according to a report received by the Touring Bureau of the California State Automobile Association from J. W. Emmert, assistant superintendent of Yosemite National Park. The road crosses the high Sierra at an elevation of 9,941 feet. A road crew is clearing suowdrifts ,removing fallen trees, and repairing ditches. The work has already progressed beyond Yosemite Creek. The new $50,000 rotary snow plow purchased by the National Park Service is to be used for clearing the road in the higher elevations.

The Tioga road was built by chinese labor in 1882 at the height of the Modie and Lundy mining excitement. It cost $62,000. In 1884 the Tioga mine, in which $300,000 had been unprofitably invested, was closed and the road was abandoned. In 1851 a group of public-spirited citizens headed by the late Stephen T. Mather, first director of the park service, purchased the road and donated it to the public. During recent years a great deal of improvement work has been done by the park service and the road will be in excellent condition this summer, it is epected.

An impressive scenic trip is offered by the Tioga road, which provideh a connection between Yosemite of 206 miles. Tioga Pass, the summit of the road, is a summer eastern entrance to the park. Among the attractive features along the road are the pass itself, Tenaya lake, Tuolumne Meadows, Lee Vining Canyon and Mono Lake.

NEW LAWS FOR CALIF MOTORISTS

Increases in speed limits and other important and interesting changes in the California Vehicle Act are provided in Senate Bill No. 548, adopted at the recent session of the Legislature, according to the Legal Department of the California State Automobile Association. The measure has gone to Governor James Rolph, Jr., for his signature and none of the changes will become effective until Rugust 14, ninety days from the time the Legislature adjourned. The bill was introduced by Senator Arthur H. Breed, who fathered the orginal vehicle act in this state. A Summary of some of the principal changes is presented by George E. Sanford, general attorney of the California State Automobile Association, as follows:

Speed Limits — In open territory the limit is raised from forty miles to forty-five; in residential sections from twenty miles to twenty-five; in business districts from fifteen miles to twenty. These speeds are lawful only when conditions permit them to be made with safety. Limits of fifteen miles an hour remain unchanged at grade crosings or intersections where there is not a clear view; on "blind" curves; and in school zones. It is made unlawful to drive so slowly as to impede traffic.

In the event of damage suits it is provided that speed in excess of the limit shall not be considered as negligence in itself. Proof that speed consitituted negligence must be given.

Crowding Front Seat — It is made unlawful for such a member of persons to occupy the front seat of a car that the driver's view is obstructed or his control of the vehicle is affected.

Use Of Sirens — Emergency vehicles, such as police patrols, fire apparatus, and ambulances, are prohibited from using a siren except when actually responding to an emergency call. Officers are prohibited from using a siren or exceeding the speed limit while acting as an escort for a procession of vehicles.

Passing on Right On the right half of paved city streets with space for two or more lines of traffic in each direction passing another car on the right as well as the left will be permitted.

Meeting On Grade — When two cars meet on a grade where the road is too narrow for passing the driver of the descending car is required to back up to a point where it is possible for the care to pass.

Safe Sondition — Officers are authorized to stop cars believed to be unsafe mechanical conditions and to make an arrest or give notice requiring the defects to be corrected.

Minimum Age — The minimum aga for issuance of an operator's from fourteen years to sixteen, but a license may be issued to minors between fourteen and sixteen upon special application by parents or guardian stating the reasons therefor.

Pedestrian Rights — Vehicles must yield the right of way to pedestrians crossing a roadway in a marked crosscut and are prohibited from overtaking or passing a vehicle that has stopped at such a crosscut.

Notice Of Sale — The seller as well as the buyers of a vehicle is required to notify the Division of Motor Vehicles of any sale or transfer.

Coasting — It is declared unlawful to coast a car with the gears in neutral.

Placing License Plates — The minimum distance above the ground for license plates is decreased twenty-four inches to sixteen.

Roadside Lights — Any light within view of a highway which is of such brillance color that it impars the vision of a driver on the highway may be removed by state or local authorities without notice.

Straying Livestock — Permitting livestock to stray unattended is made unlawful on any highway where the road is seperated from adjoining property by a fence or other barrier.

"Taking" A Car — Driving a vehicle away without the owner's consent is made a felony.

WHAT ABOUT SILVER?

After a sleep of 30 years, not thus far as a partisan issue but as a matter of economic concern, gives signs of waking up. The recent International Chamber of Commerce at Washington discussed it at some length and adopted a resolution asking that the subject be studied with a view to restoring the value of silver to something approching the normal, and Senator Broch a day or two later in a talk over the radio poinaed out that extent to which the universal demonetization of silver had been responding for the world-wide depression in business. What it means, the Senator said it that the purchasing power of two-thirds the population of the globe has in effect been cut in half. It begins to look as if silver might divide the honore with wheat as a topic of debate in the halls of Congress at its next Session.—

MILLING AT PORCUPINE UNITED GOLD MINES

The description of milling at a small gold mine adpacent to the Hollinger and McIntyre properties at Timmins, Ontario, by Ronald, A. recently issued by the United States Commerce is of particular interest as an instance where, with a small initial outlay for plant and equipment, development of a mine has been carried on almost entirely on proceeds from a 25-ton pilot mill.

About 75 per cent of the gold in the ore is free milling and farily coarse. The crude ore is fed to a crusher which breaks the ore to about 1-inch size. Next it is reduced to about one half inch rolih and is then ground in a ball-mill until about 65 per cent of it passes through 200mesh. The ball-mill discharge is thinned with water and distributed two 4 by 8-ft. copper amalgamation plates with 4 feet of blankets of their lower ends. Forty per cent of the total gold recovery is made on the plates.

The discharge from the plates goes to a duplex classifier which is in closed circuit with the plates and the ball-mill. The rake product from the classifier is returned to the ball mill, and the overflow runs to an impact amalgamator attached to a concentrating table. The amalgamator catches fine gold which has escaped the plates, blankets and traps. The table concentrates average $40 per ton and after dewatering are cyanided by an affiliated company. The table tailings go to the waste dump.

The concentrates caught on the blankets and in the traps are ground in an amalgamation barrel. The amalgam is restored in the plant and sponge gold is melted and cast into ingots at the refineryof of the affiliated company. The average grade bullion is gold 770 fine, and silver 120 to 140 fine. The total operating cost per ton of ore treted is $1.85.

Further details are given in Information Circular 6433. "Amalgamation Practice at Porcupine United Gold Mines, Ltd., Timmins, Ont.," copies of which may be obtained free from the Uuited States Bureau of Mines, Department of Commerce, washington, D. C.

He finds the market for what he grows by using his telephone

A TRUCK gardener 8 miles east of Stockton knows that his vegetables are worth more when they are delivered *fresh to the markets that need them.*

So he calls all possible markets every morning by Telephone. This prevents unproductive trips, wasted hauling, and spoilage.

This farmer makes more profit from a small farm than many farmers can make on a much larger farm that does not have a telephone.

The BEST Gray Hair Remedy is Home Made

To half pint of water add one ounce bay rum, asmall box of Barbo Compound and one-fourth ounce of glycerine. Any druggist can put this up or you can mix it at home at very little cost. Apply to the hair twice a week until the desired shade is obtained. It will gradually darken streaked, faded or gray hair and make it soft and glossy. Barbo will not color the scalp, is not sticky or greasy and does not rub off.

MINING PRACTICE AT VALEDON NEW MEXICO

Mining methods of the Eighty-Five mines of the Calumet and Arizona Mining Co., near Valedon, N. Mex., are discused in an information circular just by the United States Bureau of Mines, Department of Commerce, written by Ralph B. Youtz.

A production of 7,000 to 8,000 tons per month of siliceous copper-gold-silver ore is mined from steep veins occuring in igneous country rocks, chiefly granodiorite. Ore shoote are presistent, and veins, ranging from 2 to 100 feet wide, average 5 feet in width, usually with commercial rather than structural limits. In the upper levels both walls and vein filling are hard and firm, and will stand open indefinitely, but below the 1,350 level more intense mineralization of the walls has taken place, requiring cut-and-fill methods in some place.

Experience has shown the ore to be so uniformly continuous that the only exploratory work now procticed consists in the routine opening up of deeper levels, with some extra crosscutting and raising near the ends of the vein. Reserves are estimated in 100-foot blocks on the basis of channel samples, with proper allowances for horses of waste, dilution, and discrepancies between mine and smelter assays.

The mine is developed in the usual way by vertical shafts (two for operating use), drifts, crosscuts, and raises. Developed, drilling and blasting, and shaft-sinking details are well treated. An interesting feature of the latter is the use of key-board blocking, which has proven superior to stull-blocking in shaft timbering.

Shrinkage has always been the most important stoping method at this property. Inclined cut-and-fill stopes are restored to where the walls are very week, where the vein is wide but contains horses or brands of waste, or where high-grade ore occure in narrow veins. All ore is hand sorted from surface picking belt.

Shrinking stoping is usually done in connection with drift-back timbering although in wide veins or where the ore immediately above the drift is of marginal grade, pillars may be left. These pillars are usually recoverable on completion of the stope from below, if their frade warrants. In firm ground cribbed manways are carried through the broken ore between stopes. This necessitates special drawing procedure to prevent crushing of the manways by runs of ore occasioned by unequal drawing on the two sides. In heavier or faulted ground, small pillars are left to protect the manways, with dog-holes broken through to the stope at about 35-foot intervals. Where foot-wall drifts have been driven stopes are carried direct to the level above; otherwise the floor pillar may be recovered later. Ore remaining in stopes as drift-back pillars or cones between shutes is pulled through the stopes below. Present extraction is close to 100 per cent, although considerable waste from the walls must be sorted out.

Cut-and-fill stoping is treated in detail. Pumping is an important item some 450 gallons per minute being raised in several lifts. Ventilation has become a problem in the bottom level, where the mine water has a temperature of 104° F. All underground labor is on a cntract basis.

Total mining cost in August, 1930, was $4.49 per wet ton with a production of 1.45 wet tons per man-shift. In two typical shrinkage and two cut-and-fill stopes, stoping costs were $1.23 and $1.75, and $2.45 and $2.37 per ton, respectivel.

Details are given fully in Information Circular 6413, "Mining Methods at the Eighty-Five Mines, Calumet and Arizona Mining Co., Valedon, N. Mex.," which may be procured free of charge from the United States Bureau of Mines, Department of Commerce, Washington, D. C.

0

TO PUBLISH MOTOR VEHICLE ACCIDENTS

Publication of the first complete set of statistics on motor vehicle accidents ever issued since the formation of the California Highway Patrol was announced today by Victor W. Killick, departmental statistician.

THhe pamphlet will be assembled for use of the general public as well as all students of traffic accident problems.

Believing, however, that the traffic accident problem can be better understood thereby, Killick has included studies of all the other factors involved, such as increasing population, number of operating vehicles, mileage per car, gasoline consumption, etc.

Causes of accidents are given considerable space and are analyzed in considerable detail. Factors tending to cause accidents, such as slippery pavements, foggy weather, mechanical defects, etc., are given consideration.

"It is our hope that wide and immediate use of the information set down in the phamphlet may be made to the end that a better understanding of the causes of accidents may help decrease them," Killick said.

Copies of the phamphlet may be obtained by writing to the Bureau of Statistics of the California Highway Patrol located at Sacramento.

IDLE PROPERTY TO RESUME OPRATIONS

JAMESTOWN, Calif., May 27.—The Arbone property, near Tuttletown, idle fro the last 20 years, has taken over by W .E. Campbell, from Cassius Sewer , of Tuttletown, and preparations for the resumption of operations are under way. It has a 600-foot incline shaft on a three to four foot vein with laterials at the 1000 200 and 400 foot depths, on which ore varying value has been exposed in past operations.

Dr. R. I. Bromley and Leanord Leape of Sonora have franted E. T. Preble of Los Angles a lease and bond on the Bromley property about three miles north of James town. Surface development work has exposed a network of veins of varying widths and values on the property, it is stated.

Roy H. Rushing, of Jamestown, has advanced a tunnel 125 feet on his lease covering a large block of ground of the App ranch, two miles south of Jamestown. He is driving to tap an ancient river channel believed to have been the source of placer gold mined in adjacent gulches in the early days, according to located in the Rainier National Forest, Washington, comprises 24,300 acres of forest land extending one-half mile on either side of the Natches Pass Highway for a distance of 5 miles. The outstanding scenic and inspirational function of this memorial area will be safeguarded by the Forest Service.

ANGELINI CICOGNI, Prop.

YELLOW ASTER MINE TO START DEVELOPMENT

SAN ANDREAS, Calif., May 28—The Gledick Mines Corporation, a Los Angles concern, has acquired, under lease and bond, from J. C. McDonald, the Yellow Aster mine on the Calaveras County side of the Mokelume River, five miles north of West Point, and inaugurated operations, under the supervision of H. R. Derrer, Los Angles mining man. A 500-foot drift tunnel, extended in the early days, is being continued on about a two-foot face of ore assaying, it is stated, $40 a ton in gold. At a point about 150 feet from the portal of the tunnel a raise has been started on 10 inches of ore which is said to average $1440 a ton in gold. The property is equiped with a three stamp mill.

John Morris and associates of Los Angles, who are operating several placer gravel properties in Tuolumne County ,have extended their investigation to Calaveras County. They have taken under leose and bond from W. H. Luddy and A. L. Wyllie six parcels of placer gravel ground approximating 844 acres, about three miles southwest of San Andreas. Testing operations are soon to be started, it is stated. J. S. Cademortari, of Sonora, will supervise the work.

The Red Hill group of five claims, on the Calaveras County side of the Stanislaus River ,one mile east of Melones(has been taken over under lease and bond, from T. H. MacArdle, of Sonora, by W. A. Snider and V. V. Gee, of Long Beach, Calif. Past Surface operations have resulted in the exposure of several promising showings, it is stated.

0

GERMAN INTERESTS MAY BUY EUREKA HOLDINGS

SUTTER CREEK, Cal., May 27—An unofficial rumor is current to the negotiating for the purchase from San Francisco owners of the controlling stock interest of the South Eureka Mining Company, the property of which extends along the main segment of the Mother Lode, near this town, for about half mile, with the Central Eureka mine adjoining it on the north and the Kennedy mine on the south. Offical confrimation of the report is unobtainable, at least at present. Partically idle for more than a decade, the South Eureka mine has a 2,700-foot three-gives a vertical depth of 2,470 feet, about half that of the Kennedy property, the deepest gold mine in the United States. Because of its location and early production, mining men familiar with the Mother Lode have long considered the South Eureka as possessing unusual potentialities at greater depth.

With the completion of the installation of all necessary machinery and the erection of a 50-foot head frame, operations of the Russel-Kent Mining Corporation of Delaware on the Courtwright 450-acre property, three miles west of Jackson, have reached a stage permitting of rapid sinking of the vertical shaft, now down 25 feet and being broken three-compartment size. The company, an incorporated partnership of five New York and Boston business men, has recently increased present 23 men.

The project, financed by private funds, is the most ambititous mining undertaking launched along the Mother Lode in Amador County in recent years. It is being watched with keen interest by the mining fraternity, espically on account of the remoteness of the operation to the west of the main segment of the great vein system. A depth of 1,200 feet is the present objective of the management, with the first level at the 300-foot point.

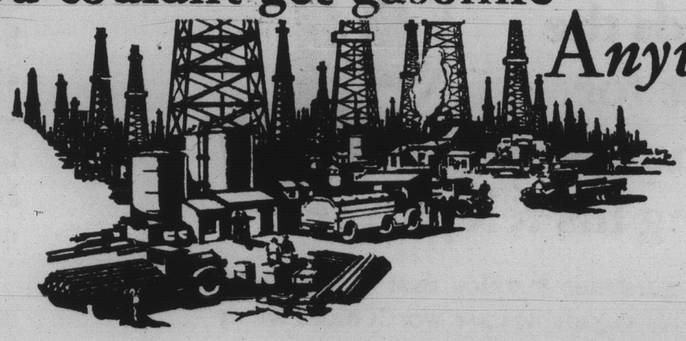
★ BUILDERS OF CALIFORNIA

Suppose you couldn't get gasoline *Anywhere*



IMAGINE: Every motor vehicle in California *stopped dead* for want of fuel.

It would not happen, of course. But it does illustrate how *everyone* depends on gasoline. California motorists, in 1930, used *one billion, three hundred million* gallons.

In production, refining and distribution, the petroleum industry employs an estimated 300,000 people throughout the state. Such widespread operations enable the major oil companies to make extensive use of the statewide service of this Bank.

With 200 separate Bank of America accounts in 147 communities, these companies collect thousands of small checks quickly; transfer funds with minimum delay and expense; obtain accurate reports and appraisals from widely-separated localities; simplify their accounting and effect other economies which mean improved service to motorists.

The Bank also serves approximately 75,000 *individual* depositors in the industry—any one of whom may be suddenly transferred to another territory. In this event, the Bank will promptly forward funds — and even valuables in safe deposit — to any branch; and with a letter of introduction, the customer quickly feels at home.

Bank of America is organized to give complete, convenient service to any business man — to any family — to *you*.

7 *of the* 8 LARGEST OIL COMPANIES in California are served by Bank of America

CAMPTONVILLE ITEMS

COMPTONVILLE, May 28—Mrs. Carl C. Sutton and daughter of Downieville passed through town Friday enroute to the lower country.

Miss Carrol Nelson left Thursday for her home at Aptos after spending a couple of weeks visiting her sister Mrs. Fred H. Butz at Celestial Valley.

Julis E. Pauly and wife left Friday on a brief visit returning Saturday afternoon.

Mrs. Fenton arrived Thursday from Nevada City to spend a few days visiting at the Hotel Francis.

District Attorney M. McMahon of Downieville passed through enroute to Nevada City on business.

Mrs Je Lavezzola of Downieville passed through Thursday enroute to Nevada City on a shrot ivsit.

Erle Pauly arrived Saturday from Marysville to spend the week end visiting his parents.

Miss Doris Nightingale, teacher in the Nevada City schools, spent the week end at her home at Pike City visiting her mother.

Miss Lola M. Labadie and brothers John and Alferd Labadie and Miss Mary Camp of Browns Valley were in town Saturday evening attending the dance.

Eugene Curtis, Depty Sheriff from Marysville was in town Saturday night on offical business.

Fred C. Cassidy of Nevada City passed through town Monday morning enroute to his home from Nevada city.

Mr and Mrs. Hawly H. Chatfield, Mr. and Mrs. Oliver Chatfield and Mrs. M. J. Cunningham and granddaughter Miss Dorthy Marks, and Jimmie Halkyard were in town Saturday evening attending the big dance.

Fred H. Butz motored to Nevada City Monday on a short visit.

Myron Pauly and brother Erle Pauly left Monday for Marysville to resume their studies after spending the week end here.

Miss Flossie Nelson who has been visiting her sister Mrs. Fred H. Butz at Celestial Calley left Monday for her home at Aptos.

The big benefit dance given Saturday evening by the Camptonville Union School District turned out to be a big success with a record crowd from all over the country in attendance. Music was furnished by a fine orchestra from the Marysville Union High School which gave the latest in dance music, and a fine big supper was served at midnight.

The Rev. Monsigneur Father Charles A Ramm of San Francisco, who is spending a few weeks visiting his brother John G. Ramm and sister Miss Emma J. Ramm, will hold service at 8: 30 Sunday morning, May 31st., in the Auditorium of the local Masonic Hall, the public invited to to attend. Father Ramm was born here and spent his early days at the old Ramm Ranch and enjoys several weeks each year visiting his old home and renewing his many old acquaintances, and it is fitting and enjoyable that he held a service in the community.

Mr. and Mrs. Earl L. Cleveland and grandaughter Miss Earlyne Cleveland, who spent the week end here left Sunday for Sacramento.

William A. Stansberry motored to Marysville Monday on a short business visit.

Mr. and Mrs. Fred J. Joubert, Mr. Acton M. Cleveland and daughter, Geraldine, and Judge W. B. Meek motored to Nevada City Monday on a short visit.

Mrs. Henry W. Huckins, Mrs. Lila Woods and son and Mrs. Bane Crawford and child of North San Juan passed through town Wednesday enroute to Downieville on a short business trip.

William Labadie and son John Labadie of Browns Valley were in town Wednesday visiting relatives.

Fred J. Joubert motored to Nevada City Wednesday on a short business visit.

Chas. G. Greene of Grass Valley was a business visitor in town Wednesday.

Mr. and Mrs. Acton M. Cleveland and daughter Geraldine motored to Downiefille Tuesday evening.

Mrs. F. S. Labadie and Mrs. Acton M. Cleveland motored to Nevada City Thursday on a short business visit.

Mr. and Mrs. William Casserly passed through town Wednesday evening with cattle en route to their ranch.

Commencement exercises for the Camptonville Branch of the Marysville Union High School will be held Saturday evening, June 6th, in the auditorium of the local Masonic hall.

—0—

ADJUST ABSORBERS FOR RIDING COMFORT

In order to insure comfortable riding, the shock absorbers should be checked occasionally for proper adjustments, suggests the Free Emergency Road Service of the California State Automobile Association.

FRENCH CORRAL ITEMS

FRENCH CORRAL, May 26, (Special to The Nugget)— It seems that "April Shawers" have been postponed to May this year. Sunday night and Monday evening we received a treat in this line. While those late showers do much good they do much harm also, but what are you going to do about it!? Just get ready to do lots of the work over again and be thankful for that splendid irrigation our gardens and ranches have received.

Wel, nothing stops the tourist now-a-days (except the "close of Yuba Pass"), and they come in such numbers that we find it impossible to keep track of them. And relic hunters! Well, I'll say! (We really have never adopted this very common expression of today, but it seems to mean so much, in most any line, that perhaps we'll be better understood if we take it up). So here goes "I'll say!—

Mentioning relics reminds us that we are guilty of a gross ommission in not expressing our expression of J. A. Wolff's efforts in restoring the history of the old San Juan Ridge. His splendid article in the Sacramento Union of recent date was read with much interest and every old Ridgeite should have a copy to preserve as a memento. In re the robber slaying by Steve Venard, will state that two of those men had spent the winter before, in French Corral and were well known and liked by many of us. Jack Williams, who went by the nickname of "Shanks" was a special favorite with the children of the neighborhood, to whom he was always very kind.

Well, we are drifting away from "Items" and going into history with Mr. Wolff.—More anon.

Mr. Geo. Beisley, who with his partner Mr. W. Simmons, spent the summer of 1929 in our neighborhood, called on his friends last Tuesday when on his way to Oregon Creek.

Mrs. K. Sullivan had business in Grass Valley and Nevada City Wednesday.

Lloyd Haslett was a visitor in Nevada City and Grass Valley Wednesday.

J. W. Culver made a trip to Nevada City Wednesday. He was accompanied by Geo. L. Sweetland, who has gone to the County Hospital to receive treatment from Dr. Tickell. Mr. Sweetland has been ailing for several weeks.

Mr. A. Browning, who received a serious injury to his left hand two weeks ago while at work in the Mayflower mine, returned to his home Wednesday evening. He has been in a Sacramento hospital under the care of a specialist for the past weeks and will now be treated by a physician in Auburn.

A specal meeting of Columbia Parlor No. 70, N. D. G. W., was held Saturday afternoon. Past Gr. Pres. Alison F. Watt paid a visit to the Parlor. She was accompanied by sisters from Manzanita Parlor, Grass Valley and Clear Lake Parlor Lake county. A delicious luncheon was enjoyed under the shade of a giant fig tree. After luncheon the sisters repaired to their hall to give attention to the business part of the meeting.. All spent a very happy time together and look forward to many more of those delightful gatherings.

Mr. and Mrs. R. McNamara of Tyler were Friday visitors at the home of Mr. and Mrs. J. Culver. Mrs. McNamara remained until Sunday. She is a member of Columbia Parlod and came to be in attendance at their meeting.

Rev. Fr. O'Rielly held services in Birchville Sunday.

Mr. and Mrs. Elmer E. Jones of Oakland, who have been spending the past week with their friends, Mr. and Mrs. Edward May of this place rethrned to their home Sunday afternoon. Mr. Jones is employed by the Oakland Tribune.

Miss Frances Moulton arrompanied by her friends Ioyl and Eysyl Hinshaw, Ddolph Pound and Franris Belrher of Sacramento spent Sunday with her parents, Mr. and Mrs. W. E. Moulton of French Corral.

The entertainment which was to have been held at the French Corral school house Monday night, at which time diplomas would be presented to the graduates, was postponed Monday evening, when word was received of the death of Mrs. Theodore Schwartz, Sr.

We extend our deepest sympathy to all the members of the family of Mrs. Sophia Schwartz. In the passing of this good woman, another of our pioneer mothers has gone to her eternal rest .All mourn her demise for she was well known, and respected, and beloved by everyone. The history of her life's good works would fill a volumne.

STATE MINING CELEBRATION

SUMMONS

NO. 5928

In the Superior Court of the State of California in and for the County of Nevada.

ANNA LUTHER, Plaintiff,

v.

JOHN JOHNSON; ELIZABETH E. TARR; also, all other persons unknown claiming any right, title, estate, lien or interest in the real property described in the complaint adverse to plaintiff's ownership ,or any cloud upon plaintiff's title thereto, Defendants.

Action to determine adverse claims to and clouds upon title to real property, brought in the Superior Court of the State of California in and for the County of Nevada, and the complaint filed in the office of the Clerk of said County of Nevada.

NILON, HENNESSY & KELLY, Attorneys for Plaintiff, Grass Valley, California.

THE PEOPLE OF THE STATE OF CALIFORNIA SEND GREETINGS TO:

JOHN JOHNSTON; ELIZABETH E. TARR; also, all other persons unknown claiming any right, title, estate, lien or interest in the real property described in the complaint adverse to plaintiff's ownership, or any cloud upon plaintiff's title thereto, Defendants.

YOU ARE HEREBY directed to appear, and answer to the complaint in an action entitled as above, brought against you in the Superior Court of the State of California in and for the County of Nevada, within ten days after the service on you of this summons—if served within this County,—or within thirty days if served elsewhere.

And you are hereby notified that unless you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint as arising upon contract, or she will apply to the court for any other relief demanded in the complaint.

The following is a statement of the object of the action:

The object of the action is to determine all and every claim, estate, right, title, lien or interest in the property herein described; that the plaintiff is now, and has been, by herself and her predecessors in interest, the owner of and in the actual, exclusive and adverse possession of the property hereinafter described continuously for the period of more than twenty years immediately preceding the filing of the complaint in this action, claiming to own the same in fee against the whole world, and that plaintiff has, by herself and by her predecessors in interest, paid all taxes of every kind and nature whatever, levied or assessed against said real property during the period of five years continuously immediately preceding the filing of complaint aforesaid; that the claims or claim of said defendants is without right, and that they have not, nor has any, or either of them, any right, title, estate, lien or interest in said real property or any part or portion thereof.

The land and property affected by this action is:

All that certain real property situate in the City of Grass Valley, County of Nevada, State of California, and bounded and particularly described as follows, to wit:

All that portion of Lot 9 in Block 27 of the Town, now City, of Grass Valley, as said lot and block are designated upon the official map of the Town of Grass Valley made by Samuel Bethell in the year 1872, and more particularly described as follows, to wit:

Beginning at the South East Corner of Lot 9, on the North line of Neal Street of said City of Grass Valley, from which the South West corner of Lot 8, the intersection of the East line of Mill Street and the North line of Neal Street, bears N 57° 18' W at the distance of 208.11 feet; thence N 22° 34' E along the line between lots 9 and 10, 66.89 feet to the corner common to lots 9, 10 and 12 of said Block 27; thence N 18° 14' E along the line between lots 9 and 12, 47.14 feet to the North East corner of lot 9 on the West line of lot 12; thence N 67° 50' W along the line between lots 9 and 6A, 38.50 feet; thence S 23° 47' W 105.73 feet to the Northerly line of Neal Street; thence S 57° 18' E along the Northerly line of Neal Street to the place of beginning.

GIVEN under my hand and the seal of the Superior Court of the State of California in and for the County of Nevada, this 15th day of May, A. D., 1931.

R. N. McCORMACK, Clerk.

By ..... Deputy Clerk.

MRS. JANE WEARN PASSES FRIDAY

The funeral of Mrs. Jane F. Wearn, who passed away in Dunsmuir Friday night was held Sunday afternoon from the Holmes Funeral Home. Reverend Washburn of Trinity Episcopalian church conducted the service . She was laid to rest in Pine Grove cemetery. Her grandsons acted as pall-bearers.

Mrs. Wearn was past 79 years of age. She was of English birth coming to this country with her husband and settling in Virginia City. After residing for a time in Oregon the family moved to Nevada City where she spent most of the remainder of her life.

She lived an exemplary life and all who had the pleasure of her acquaintance grieve deeply at her passing.

She is survived by three daughters, Mrs. Grace Evans of this city; Mrs. William Lester of Dunsmuir and Mrs. George O. Scarfe of Berkeley, and one son, James Wearn, of Dunsmuir. There are also a large number of grandchildren and onet great grandchild.

CAMP FIRE GIRLS SELL POPPIES SATURDAY

The sale of poppies on Saturday for the auxiliary of the American Legion was successfully carried on Saturday by the Camp Fire Girls who voluntered to conduct, the sale under the leadership of Luther Marsh.

The poppies were made by the veterans in the hospitals and the funds go to them.

The Nevada City girls succeeded in disposing of their quota.

N. D. G. W. DECORATED GRAVES OF DEPARTED SUNDAY

Last Sunday was Decoration Day for the Native Daughters, Laurel Parlor No. 6, and a committee visited the cemeteries in Nevada City and Grass Valley.

The local parlor officers look after about 35 graves, which are located in Pine Grove, the Catholic and old Jewish cemeteries in this city and in the city cemetery in Grass Valley.

QUICKSLIVER RECOVERY FROM LOW-GRADE

Methods of costs of recovering quicksliver from lowgrade ore at the reduction plant of the Sulphur Bank Syndicate, Clearlake, Califf., are discussed in an information circular by Worthen Bradley, recently issued by the United States Bureau of Mines, Department of Commerce.

The ore which occure as a surface deposit covering about 100 acres to a depth of 5 feet was originally worked for sulphur. Cinnabar finely disseninated in a gangue of altered basalt is associated with the sulphur and minor amounts of opal. The ore as a whole contains only about 2 pounds of quicksliver per ton but as the cinnabar occure mostly in the fines, the ore can be enriched by screening and hand sorting until it will assay 8 pounds of quicksliver per ton or better when it is considered furnace ore.

Methods of recovering consist of: (1) Screening and sorting the low-grade or to obtain a furnace feed, (2) Treatment of the ore in a rotary klin, (3) precipition of the dust carried from the furnace in the gas stream, (4) Condensing quicksliver from the gas stream as (a) high-grade mud and (b) low-grade mud, (5) Flotation treatment of low-grade mud to obtain high-grade concentrates, (6) Drying and restoring high-grade condenser mud and flotation concentrates to make a finshed product. The plant treats about 1,300 tons of ore and recoveres about 9,100 pounds of quicksliver uer month.

MINERS LEAGUE MAKES PLANS FOR ANNUAL PICNIC

Plans for a big picnic are being discussed by the Mine Workers Protective League with the expectation that the affair will be held about the middle of June. This annual affair is one of the activities of the miners organization and is usually a well patronized event.

At their next meeting the league will name committees to handle the various picnic details including selection of the recreation spot.

Nomination of officers for the next six monts term will be received at the next two Thursday night meetings.

MR. AND MRS. WALTER HUSON ENTERTAIN AT PARTY

Mr. and Mrs. Walter Huson, a newly wedded couple, entertained a large number of friends Saturday evening. The departing guests after a most enjoyable time, departed wishing the young couple the best of luck and happiness.

AMADOR STAR MINE ASSAYS RUN HIGH

SUTTER CREEK, Calif ., May 28—Assays as high as $170., a ton in gold are being obtained from samples from a two-foot face of ore recently exposed and being followed by a north drift, now 100 feet in length, from the 225-foot west crosscue on the 300-foot level of the property of the Amador Star Mining Company, 12 miles north of Sutter Creek. When first revealed the ore showed only narrow width but has been increasing about four inches with each succeeding round of shote, according to Manager John Ratto, who is confident that the drift is just entering the downward extension of an ore-body exposed by previous operators about 15 years ago in a 500-foot drift tunnel, at an elevation of 230 feet above the new working now being advanced on the 300-foot level of the shaft. In the tunnel the ore-body shows a length of 200 feet and varies in width from four to five feet, with averages assays of $8., a ton in gold.

Specimen ore showing large particles of free gold is being found in the surface mining of five to six feet of vein watter, averaging $20 a ton, on the Wheeler-Humple lease on the southern section of the Ballard mine, four miles north of Plymouth. The leasers started operations about two months ago and have met with such encourging results that they have erected a five-stamp mill that operators one shift of eight hours daily and treats five tons of ore.

M. Hamburger of Los Angles, opertating under a lease and bond from the owner, Mrs. Ella Adams, has inaugurated development work on a large scale on a 880-acre property, 10 miles north of Plymouth. He is installing a power shovel for the mining of a huge vein system coursing through the property.

O. E. S. TO CELEBRATE ANNIVERSARY SOON

Evangeline Chapter of Eastern Star will celebrate the Fifty-eighth anniversary on Saturday evening, June 13, 1931 at the Masonic Hall. There will be cards dancing and refreshments, Cards are being sent to the members to assure a large attendance. It is planned to make the event a home Coming event.

JOBS DAUGHTER TO BE ORGANIZED LOCALLY

The young girls of Grass Valley Nevada City and Smartsville are to have an opportunity of becoming Jobs Daughters in the near future. The organization for young girls between the ages of 13 and 18 is sponsored by the Order of Eastern Star.

The girls who are interested are to meet at the Golden Poppy in Grass Valley Friday evening to have the aims and purposes of the organization explaned to them.

RAIN BENEFITS FARMERS

The rain god dealt more kindly with the poor farmer than was hoped for. The 3.14 inches falling Lake Bowman menat $30,000 in cash to the Nevada Irrigation District.

SKATING AND DANCING ENJOYED AT LA BARR

The newly built La Barr Dance Hall is a popular place with skating going on every evening. Saturday nights the roller skates give way to terpiscore and couples sway to delightful music.

This Saturday afternoon there will be a special skating party from 1 to 4:30 for the benefit of out of town visitors.

Saturday evening there will be a special Memorial dance.

Born—To Dr. and Mrs. John Mott Rector, at Detroit, Michigan, May 24th, a son, Frederick Gilbert.

EPWORTH LEAGUERS HELD PICNIC AT CRABB RANCH

A delightful time was enjoyed by the Epworth Leaguers Monday evening when they gathered at the Crabb Ranch west of Nevada City for a picnic.

They had as guests the teachers of the high school who had taken an active interest in the Leaguers during the past season.

Wm. Veale formerly of Nevada City but who has been making his home in Berkeley for the past few years, is spending a few days in Nevada City.
